

Concept

Open Deck Series

27

Superior handling and maximum performance that's powered by either a single engine or twin engines means ear-to-ear grins and a low cost of ownership.

Fun in the Sun

Dually suited for a fun day on the water with family and friends or the occasional offshore fishing excursion, the Concept 27' is one of our most versatile models yet. Superior handling and maximum performance with only a single engine means ear-to-ear grins and a low cost of ownership. Stylishly appointed and rigged to perfection, the 27' is a solid choice for a best-all-around adventure machine.

Generous interior space allows for 360-degree movement around the center console. Standard bow and rear seating accommodates up to 8 passengers. For the more serious angler, the rear seating can be removed to provide more space for fishing. Customize the 27 even more by adding a live well to your helm seat or a fresh water shower system on the transom or console. Consider an upgraded sound system for those summer days at the sandbar. Make your 27 as unique as you are.
